## Lectures and Cases Demonstration

7-9 MAY 2025

Graceland Khao Lak Hotel,  
Phang Nga, Thailand.

| Wednesday 7 <sup>th</sup> May 2025 |                                                                                                                                                            |                           |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 08.00-09.00                        | <b>Registration</b>                                                                                                                                        |                           |
| 09.00-10.30                        | <b>Session: Peripheral (1) (AIOD)</b><br>Panelist: Sorracha Rookkapan, Pong Juntarapatin, Nattawut Puangpunngam, Thatchawit Urasuk                         |                           |
| 09.00-09.15                        | <b>Lecture:</b> Optimizing Radiation Protection: Best Practices for Safety in Endovascular Procedures                                                      | Sorracha Rookkapan        |
| 09.15-09.30                        | <b>Lecture:</b> Advanced endovascular Strategies for Complex Aortoiliac Occlusive Disease (AIOD): Innovations, Best Practices, and Complication Management | Pong Juntarapatin         |
| 09.30-09.35                        | Live case 1                                                                                                                                                | PSU team                  |
| 09.35-09.50                        | • Record case 1: CERABS                                                                                                                                    | Nattawut Puangpunngam     |
| 09.50-10.05                        | • Record case 2: Complex                                                                                                                                   | Thatchawit Urasuk         |
| 10.05-10.20                        | • Record case 3: Complex AIOD                                                                                                                              | Pitikorn Srianakkawanich  |
| 10.20-10.30                        | Discussion & update live case 1                                                                                                                            |                           |
| 10.30-10.45                        | <b>Coffee break</b>                                                                                                                                        |                           |
| 10.45-12.15                        | <b>Session: Aorta (1) (Hostile neck)</b><br>Panelist: Boonprasit Kritpracha, Ismazizi Zaharudin, Veera Suwanruangsri                                       |                           |
| 10.45-11.00                        | • <b>Lecture:</b> Overcoming Challenging Anatomy: Advanced Strategies for Managing Hostile Aortic Necks                                                    | Sang Su Lee               |
| 11.00-11.05                        | Wrap up live case 1                                                                                                                                        | PSU team                  |
| 11.05-11.20                        | • Record case 1: Short neck                                                                                                                                | Pitikorn Srianakkawanich  |
| 11.20-11.35                        | • Record case 2: ChEVAR                                                                                                                                    | To be announced (Vietnam) |
| 11.35-11.50                        | • Record case 3: Wide neck/Connical neck                                                                                                                   | Sang Su Lee               |
| 11.50-12.05                        | • Record case 4: Angulated neck                                                                                                                            | Virapat Chanchitsopon     |
| 12.05-12.15                        | Discussion & Live case 2                                                                                                                                   |                           |
| 12.15-13.00                        | <b>Lunch</b>                                                                                                                                               |                           |
| 13.00-14.30                        | <b>Session: Peripheral (2) (Fem-pop I)</b><br>Panelist: Sorracha Rookkapan, Pong Juntarapatin, Wuttichai Saengprakai, Surasit Akkakrisee                   |                           |
| 13.00-13.15                        | • <b>Lecture:</b> Breaking Through Calcium: Optimizing Atherectomy Device Use for Effective Plaque Modification                                            | Surasit Akkakrisee        |
| 13.15-13.35                        | • Record case 1: Hawk one                                                                                                                                  | Sorracha Rookkapan        |
| 13.35-13.55                        | • Record case 2: Jetstream                                                                                                                                 | Wuttichai Saengprakai     |
| 13.55-14.15                        | • Record case 3: Laser                                                                                                                                     | Thatchawit Urasuk         |
| 14.15-14.30                        | Discussion & update live case 2                                                                                                                            |                           |
| 14.30-14.45                        | <b>Coffee break</b>                                                                                                                                        |                           |
| 14.45-16.30                        | <b>Session: Aorta (2) (TAAA)</b><br>Panelist: Boonprasit Kritpracha, Kiattisak Hongku, Veera Suwanruangsri, Apinan Uthapaisanwong                          |                           |
| 14.45-15.00                        | • <b>Lecture:</b> Optimizing Procedure Selection for Thoracoabdominal Aortic Aneurysms (TAAA): Key Considerations and Strategies                           | To be announced (France)  |
| 15.00-15.20                        | • Record case 1: EDM                                                                                                                                       | Ismazizi Zaharudin        |
| 15.20-15.40                        | • Record case 2: CMD                                                                                                                                       | Kiattisak Hongku          |
| 15.40-16.00                        | • Record case 3: Branch devices (off-the-shelf)                                                                                                            | Sirinya Panya             |
| 16.00-16.30                        | Discussion & wrap up live case 2                                                                                                                           |                           |
| 18.00-20.00                        | <b>Dinner Symposium by Medtronic</b>                                                                                                                       |                           |
